

RxDevice

RxDevice

RxDevice is a device and Instrument control platform.

Integrates with the RxPatterns SDK and Toolkit.

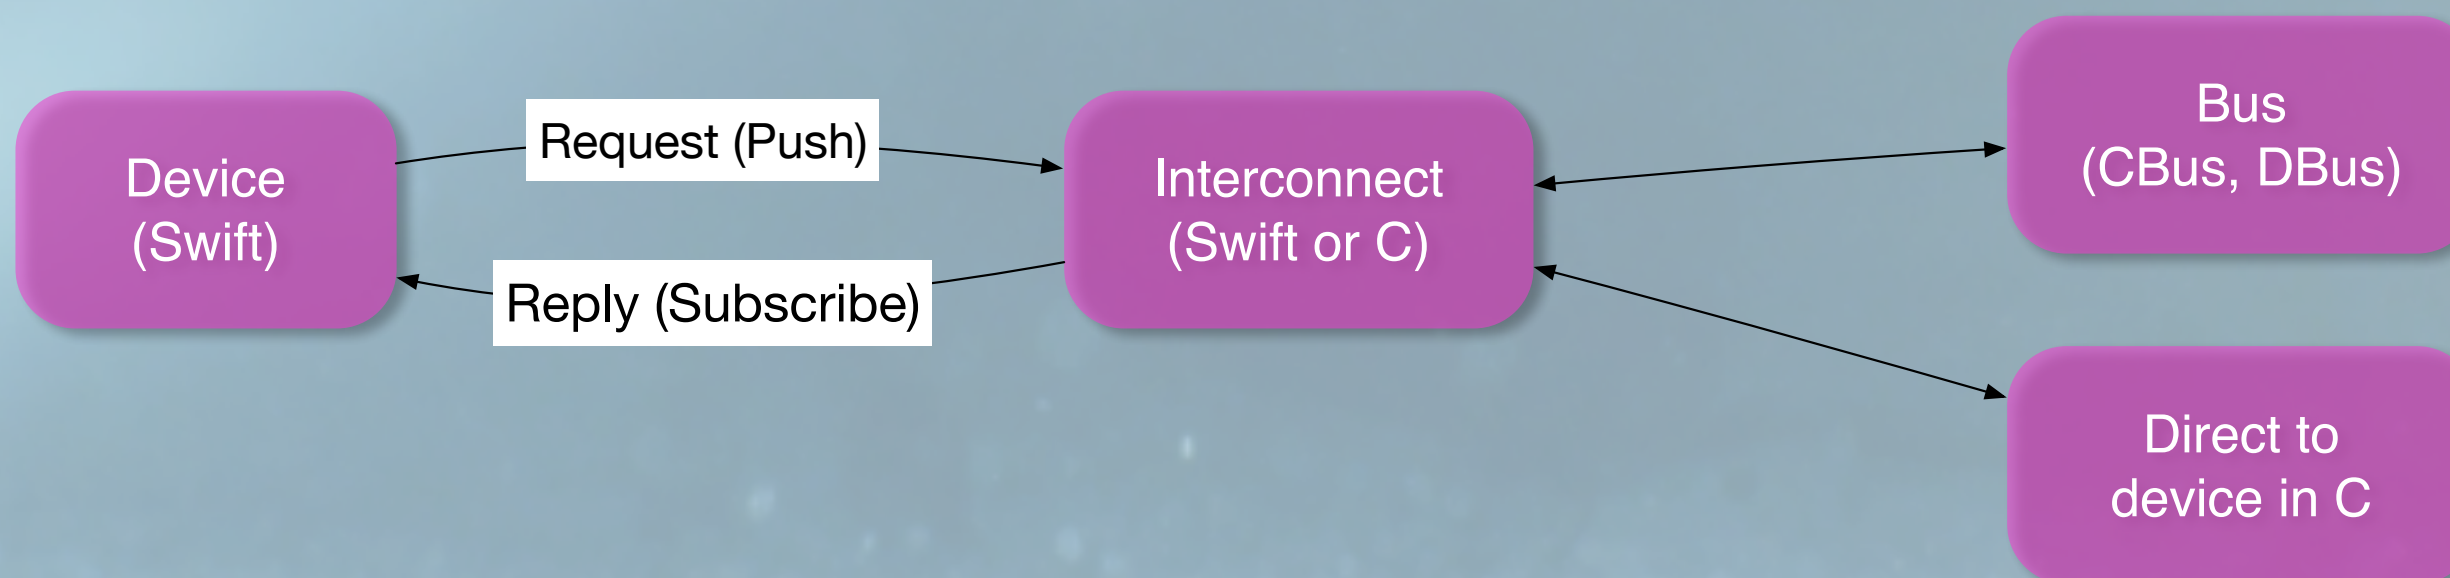

Brings Reactive Extensions to the IOT and Instrument market.

Provide support for sequencing device async operations.

Currently in alpha with an eval kit.

A

RxDevice Architecture

Brings adaptive behaviour to RxPatterns.
(Reactive Extensions is currently very static.)

Observables can be reconfigured for changing environments. Why re-subscribe for changing environments if your topology stays the same ?
